<sup>1</sup> “Monthly Unique User” means as a unique user with at least one session in a given month as determined by a unique device identifier from Google Analytics. A session initiates when a user either opens an app in the foreground or views a page or screen and no session is currently active (e.g., the user’s previous session has ended). A session ends after 30 minutes of user inactivity. We measure Monthly Unique Users during a time period longer than one month by averaging the Monthly Unique Users of each month within that period.
